

DEZAWA REGENESIS IV™

QUICK RECOVERY THAT PROTECTS
YOUR LONG GAME.

The **Dezawa Regensis IV™** offers numerous advantages over traditional mesenchymal stem cells and their exosomes due to being pluripotent-like and stress-resistant, having a higher safety profile, and broader therapeutic potential.

No shortcuts. Uniquely programmed to deliver rapid repair that can support long-term regeneration with stress-enduring cells that seamlessly integrate into your body and transform into high-functioning, durable tissue.

Harnessing the synergy of cutting-edge science, this therapy delivers unmatched regeneration at the cellular level.

POWERED BY:

**Dezawa MuseCells® (100 Million) and
Dezawa MuseExosomes® (1 Trillion)**

- Accelerated recovery and reduced downtime from high-intensity events
- Protects and repairs areas exposed to repeated stress
- Supports long-term sustainability and slows cumulative breakdown
- Includes the core performance and durability benefits of the Dezawa Restore IV®, with added regenerative signalling
- Enhanced coordination for inflammation control, tissue stabilization, and regeneration
- Enhanced efficacy using Dezawa MuseExosomes® to optimize the healing environment

Claims are based on published studies of Dezawa MuseCells® produced using the licensed intellectual property and exact methodologies of MuseCell Innovations®. Only Dezawa MuseCells® originating from MCI's manufacturing ecosystem and distributed through MCI-designated, licensed partners have the safety and clinical characteristics reported in the research.

CLINICALLY VALIDATED REGENERATION, BUILT FOR PERFORMANCE

WHY CHOOSE THE
DEZAWA REGENESIS IV™

- Accelerated Recovery ●
- Structural Durability ●
- Performance Optimization ●
- Sustained Readiness ●

DEZAWA REGENESIS IV™

TRADITIONAL MSC IV INFUSION

IMMUNE SYSTEM RESPONSE	Longer persistence in the body due to low immune system clearance and no immune reaction, ensuring safe and seamless integration	Longer persistence in the body due to low immune system clearance and no immune reaction, ensuring safe and seamless integration
STRESS ENDURANCE	Highly resistant to harsh tissue environments for improved survival and functionality	Susceptible to stress, leading to reduced efficacy in damaged tissues
TARGETED THERAPEUTIC EFFECTS	Selectively homing to damaged tissues for precise regeneration	May remain trapped in the lungs, limiting delivery to the target organ
PLURIPOTENCY	Differentiates into most cell types in the body for versatile repair	Limited to specific cell types (e.g., osteocytes, chondrocytes)

THE **DEZAWA REGENESIS IV™** REPRESENTS THE PINNACLE OF REGENERATIVE MEDICINE, ENABLING YOU TO UNLOCK UNPARALLELED HEALTH, LONGEVITY, AND TOTAL REGENESIS.
